

**ANTI EXPOSURE FLOTATION SUITS**

---

**STEARNS INC.****I580 Anti Exposure Coverall**

Stearns' I580 Challenger anti exposure coverall has been restyled: it has a new design to improve comfort. It does offer an excellent hypothermia protection and inherent buoyancy when immersed, meeting the USCG requirements. It features Suisse Aire™ flotation foam, heat taped seams for waterproofing, adjustable waist belt, many generous pockets, retro-reflective tape, an insulated hood, inflatable head support and neoprene wrist closures, thigh and ankle straps for stopping cold water circulation during immersion. Double layer of durable nylon fabric in seat and knees. This coverall is ideally suited for fast rescue craft and man overboard crews, deck operators and fisherman.

**Colour:** Orange**Sizes:** XS, S, M, L, XL, XXL, XXXL**Approvals:** USCG type III/V

**ANTI EXPOSURE FLOTATION SUITS****MS 195 FR**

A high quality worksuit that provides flotation, hypothermia and fire protection to the wearer in Search and Rescue situations.

**Features:**

- Flame Resistant (FR) anti-static 6 oz. NOMEX® IIIA outer shell and lining
- Exceeds minimum 15.5 lb Coast Guard buoyancy requirement, and falls below the maximum 35 lb buoyancy requirement for safe helicopter egress
- AirSoft™ polyvinylchloride (PVC) foam provides buoyancy and thermal insulation
- Construction enhances waterproofing
- Neoprene wrist closures and anti-flushing Tug-Tite®, at the thighs and ankles, provide anti-exposure protection
- Gusseted leg zippers
- Extra large cargo pockets at the hips for additional storage
- SOLAS/IMO approved reflective tape on the shoulders, chest and hood

Sizes: XS, S, M, L, XL, XXL, XXXL
