

**ALCOHOL DETECTION****AlcoQuant 6020**

AlcoQuant 6020 - offering you all the advantages of the latest generation of breath analyzer

The AlcoQuant 6020 sets new standards in accuracy, reliability and ease of use. This new generation of breath analyzer is more accurate compact and is easy to use. The operation of the AlcoQuant 6020 is extremely easy. The intuitive menu is controlled with only three buttons. All relevant information such as device status, measured values and error messages appear in plain text on the backlit graphic display. The user interface is self guided and simple.

All devices of the AlcoQuant series feature an electrochemical sensor that responds specifically to alcohol. A special micro-controller with evaluation software continuously checks all internal functions - before, during and after each sample. The effect of substances such as essential oils or tobacco is practically eliminated.

- Calibration is needed every 6 months
- Self calibration sets available
